Hypertext의 전달 과정

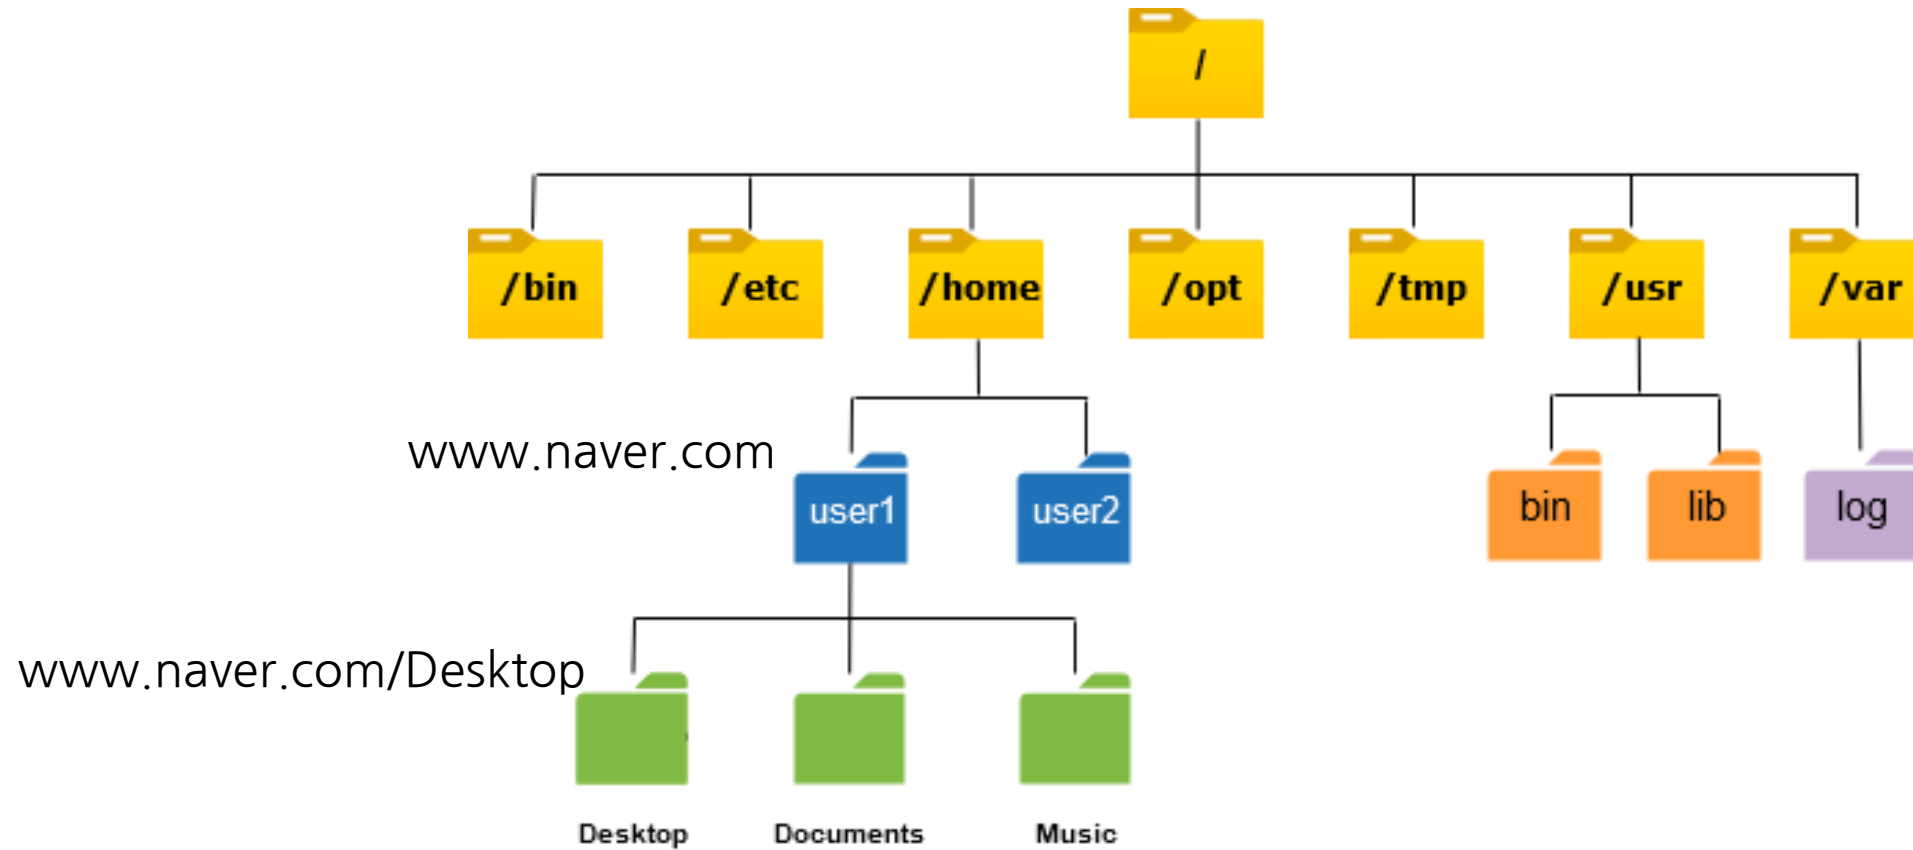

The screenshot displays the Naver homepage in a web browser. The browser's address bar shows the URL <https://www.naver.com>. The Naver logo is prominently displayed on the left, followed by a large search bar. Below the search bar, a horizontal navigation menu includes links for '메일' (Mail), '카페' (Cafe), '블로그' (Blog), '지식iN' (Knowledge iN), '쇼핑' (Shopping), '쇼핑LIVE' (Shopping LIVE), 'Pay', 'TV', '사전' (Dictionary), '뉴스' (News), '증권' (Securities), '부동산' (Real Estate), '지도' (Map), 'VIBE' (Music), '책' (Books), and '웹툰' (Webtoon). To the right of the navigation menu, the current weather is shown as -0.5° with a range from -11.0° to 1.0° and a '고동' (High Wind) warning.

The main content area is divided into several sections. On the left, there's a '연합뉴스' (Joint News) section with a headline about a '조국' (Jo Kook) scandal. Below this is a '뉴스스탠드' (News Stand) section featuring a '한겨레' (Han Gyeore) article about a '5그릇' (5-bowl) diet. The right side of the page features a user profile for '라스피남' (Raspina) with a '로그아웃' (Logout) button. Below the profile is a '트렌드쇼핑' (Trend Shopping) section with a list of products including '쿠팡' (Coupang), 'G마켓' (GMarket), '옥션' (Auction), '11번가' (11st), '이마트' (E-Mart), '티몬' (Timon), '신세계' (Shinsegae), '위메프' (Wemep), '올리브영' (Olive Young), 'GS샵' (GS Shop), '롯데' (Lotte), and 'CJ온스타일' (CJ Onstyle).

What is HTML?

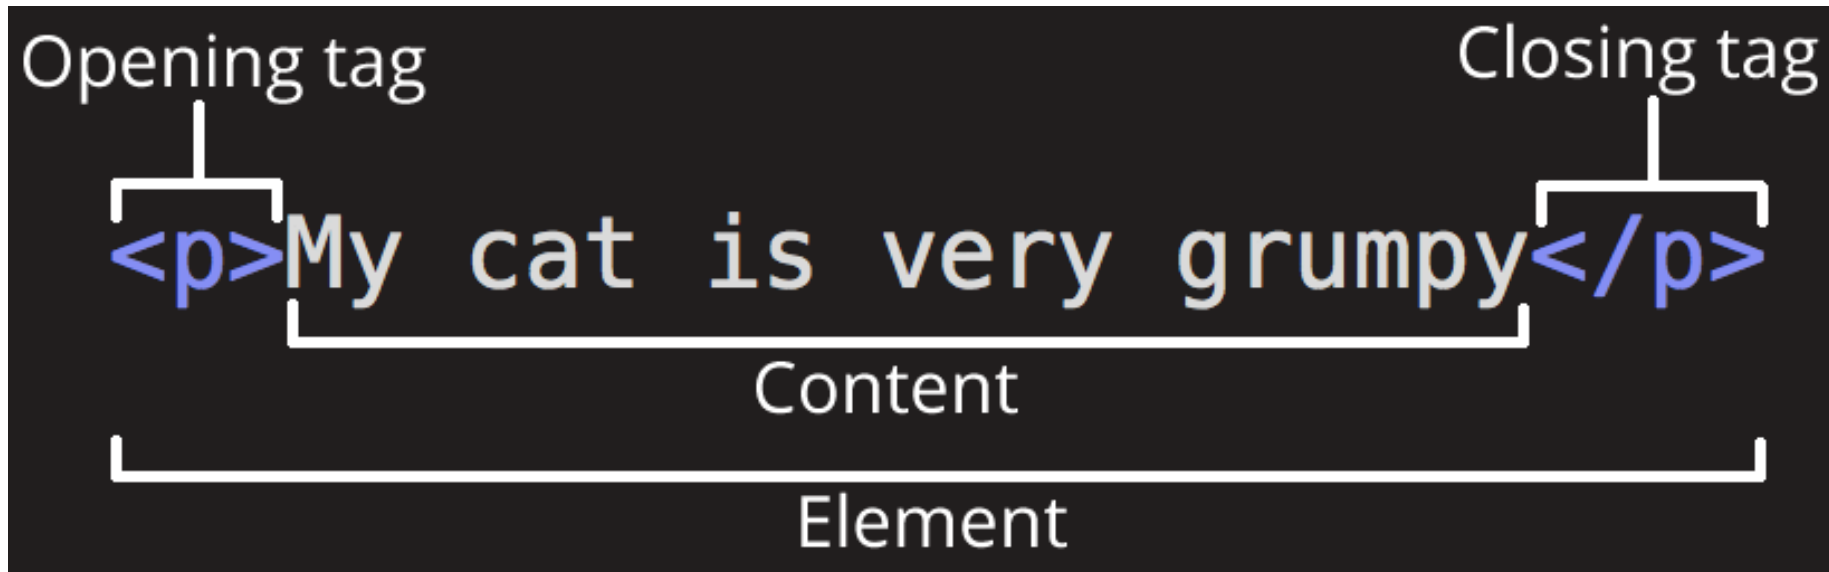

HyperText Markup Language

연결 가능한 태그로 싸여진 언어

Markup?

“영희는 이렇게 말했다”
‘영희는 이렇게 생각한다’
(영희가 말하며)
[영희]

Tag

* Tag is not case-sensitive

Semantics vs Presentational Elements

Semantics

어떠한 “의미”를 나타내는 태그

Ex)

<p>

<h1~6>

,

Presentational Elements

특정 서식을 적용하기 위한 태그(HTML5이전)
HTML5에서는 Semantic하게 재정의됨

Ex)

<i>

<u>

Two Types of Elements

Block-level Element

하나의 line을 차지하는 element

Ex)

<div>

<p>

<nav>

Inline Element

Line 안에 포함되는(in-line) element

Ex)

<a>

aside

In drama, where a character shares a comment only with the audience for humorous or dramatic effect. This is usually a feeling, thought, or piece of additional background information.

In writing, a section of content that is related to the current topic, but doesn't fit directly into the main flow of content so is presented nearby (often in a box off to the side.)

<p>Meanwhile, Harry was sitting at home, staring at his royalty statement  
  and pondering when the next spin off series would come out, when an enchanted  
  distress letter flew through his window and landed in his lap. He read it  
  hazily and sighed; "better get back to work then", he mused.</p>
```

Ron was backed into a corner by the marauding netherbeasts. Scared, but determined to protect his friends, he raised his wand and prepared to do battle, hoping that his distress call had made it through.

Meanwhile, Harry was sitting at home, staring at his royalty statement and pondering when the next spin off series would come out, when an enchanted distress letter flew through his window and landed in his lap. He read it hazily and sighed; "better get back to work then", he mused.

Basic Sections of a Document

Basic Sections of a Document

header:

Usually a big strip across the top with a big heading, logo, and perhaps a tagline. This usually stays the same from one webpage to another.

navigation bar:

Links to the site's main sections; usually represented by menu buttons, links, or tabs. Like the header, this content usually remains consistent from one webpage to another — having inconsistent navigation on your website will just lead to confused, frustrated users. Many web designers consider the navigation bar to be part of the header rather than an individual component, but that's not a requirement; in fact, some also argue that having the two separate is better for [accessibility](#), as screen readers can read the two features better if they are separate.

Basic Sections of a Document

main content:

A big area in the center that contains most of the unique content of a given webpage, for example, the video you want to watch, or the main story you're reading, or the map you want to view, or the news headlines, etc. This is the one part of the website that definitely will vary from page to page!

sidebar:

Some peripheral info, links, quotes, ads, etc. Usually, this is contextual to what is contained in the main content (for example on a news article page, the sidebar might contain the author's bio, or links to related articles) but there are also cases where you'll find some recurring elements like a secondary navigation system.

footer:

A strip across the bottom of the page that generally contains fine print, copyright notices, or contact info. It's a place to put common information (like the header) but usually, that information is not critical or secondary to the website itself. The footer is also sometimes used for [SEO](#) purposes, by providing links for quick access to popular content.

Debugging HTML

Syntax errors

These are spelling or punctuation errors in your code that actually cause the program not to run, like the Rust error shown above. These are usually easy to fix as long as you are familiar with the language's syntax and know what the error messages mean.

Logic errors

These are errors where the syntax is actually correct, but the code is not what you intended it to be, meaning that the program runs incorrectly. These are often harder to fix than syntax errors, as there isn't an error message to direct you to the source of the error.

Debugging Tools

Developer Tool : Ctrl+Shift+I or F12

Markup Validation Service : <https://validator.w3.org/>
